About Me

A developer with a great passion for the worlds of software and coding, for solving complex problems and creating an optimal user experience, who can spend hours in front of the screen in order to create a perfect product, with a hunger for never-ending learning, I will start a bachelor's degree in computer science this year and I am available for a full-time position.

Professional Experience

Application Engineer, *Au10tix*
01/2022 – 01/2023

- Providing solutions in the field of supervised machine learning and image analysis using the company's internal tools.

- Maintenance, optimizations and configurations of the company's products according to the customer's needs.

Intelligence & data Analyst, *Israeli Military Intelligence - Unit 8200*
09/2018 – 05/2021
Production and analysis of intelligence materials at a high level of classification using advanced technological systems in spoken and written Arabic.
